

HP100 High Pressure Gas Regulators by Pietro Fiorentini

- / Suitable for Natural Gas, LPG and other clean/dry gases
- / Australia's only fully endorsed first stage LPG OPSO regulator
- / Rugged, reliable, accurate and affordable

Pietro Fiorentini are the European leaders in the design, manufacture and sale of gas pressure reduction, gas filtration and gas control products. The HP100 gas regulator range is designed for commercial and industrial gas applications.

FEATURES

- > Extremely competitively priced
- > Compact design
- > 2,000 kpa Maximum Inlet Pressure
- > Used by Gas and LPG Utilities worldwide
- > Partial Internal Relief available on all models
- > Basic Non OPSO version, model HP100
- > OPSO/UPSO version, model HP100/B
- > Premium Active Monitor version, model HP100AM
- > Inbuilt Gas Filter on all models
- > Fully endorsed by the ALPGA
- > Available with NPT, BSP or ANSI 150# Flanged
- > Outlet Pressure range 20 - 450 kPa
- > Inbuilt outlet pressure test point
- > Maximum LPG loads of up to 12,000 MJ
- > Post Mounting Brackets available
- > Outlet Pressure Gauges available

MODEL REQUIREMENTS

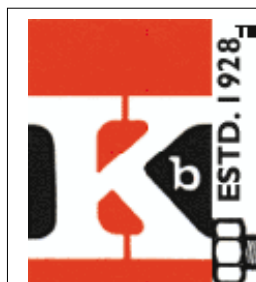

- > HP100 - AP Low Pressure 20 - 80kPa
- > HP100 - APTR High Pressure 80 - 450 kPa
- > OPSO/UPSO version available
- > Active Monitor version available
- > Specialised versions available upon request

SAVE TIME - SAVE MONEY

- > Faster installation
- > Less pipework and fittings needed than other conventional regulators
- > No separate slam shut and/or relief valve required in your downstream piping
- > Significantly improves the safety on systems that use full flow relief as their means of over pressure protection
